Stylista WP Theme

The Stylista Theme is a Premium WordPress Theme suitable for fashion websites, make-up artist shops, clothing line, hair stylists and other fashionista!

Stylista WP Theme was developed with StartBox (a theming framework from WebDevStudios)

Features

-- Responsive full width background

-- SEO Optimized

-- Upload logo

-- Upload favicon

-- Page layout options

-- Beautiful Gallery Plugin

-- Retina ready social icons

-- Widgetized footer area

-- Interactive Google Map for company address

-- Multi-language support

Installation -- Local

1. Down and extract the WordPress project, renaming it to your project name, in this case 'style', and dumping the extracted folder in the document root of your local web server.

2. Launch a browser and Go to http://localhost/phpmyadmin

3. Create a database called 'style'

4. Run the project installation by going to http://localhost/style

 -- Enter your database details and run the install

-- After installation, sign in into the dashboard with your username and password just created.

5. On the dashboard, goto Appearance->Themes

 -- Click on the Add New button as seen below to install the Startbox Theme first!, and then install the Stylista Theme next.

 --* The Stylista Theme rests on the StartBox Theme which is its parent theme.

FP
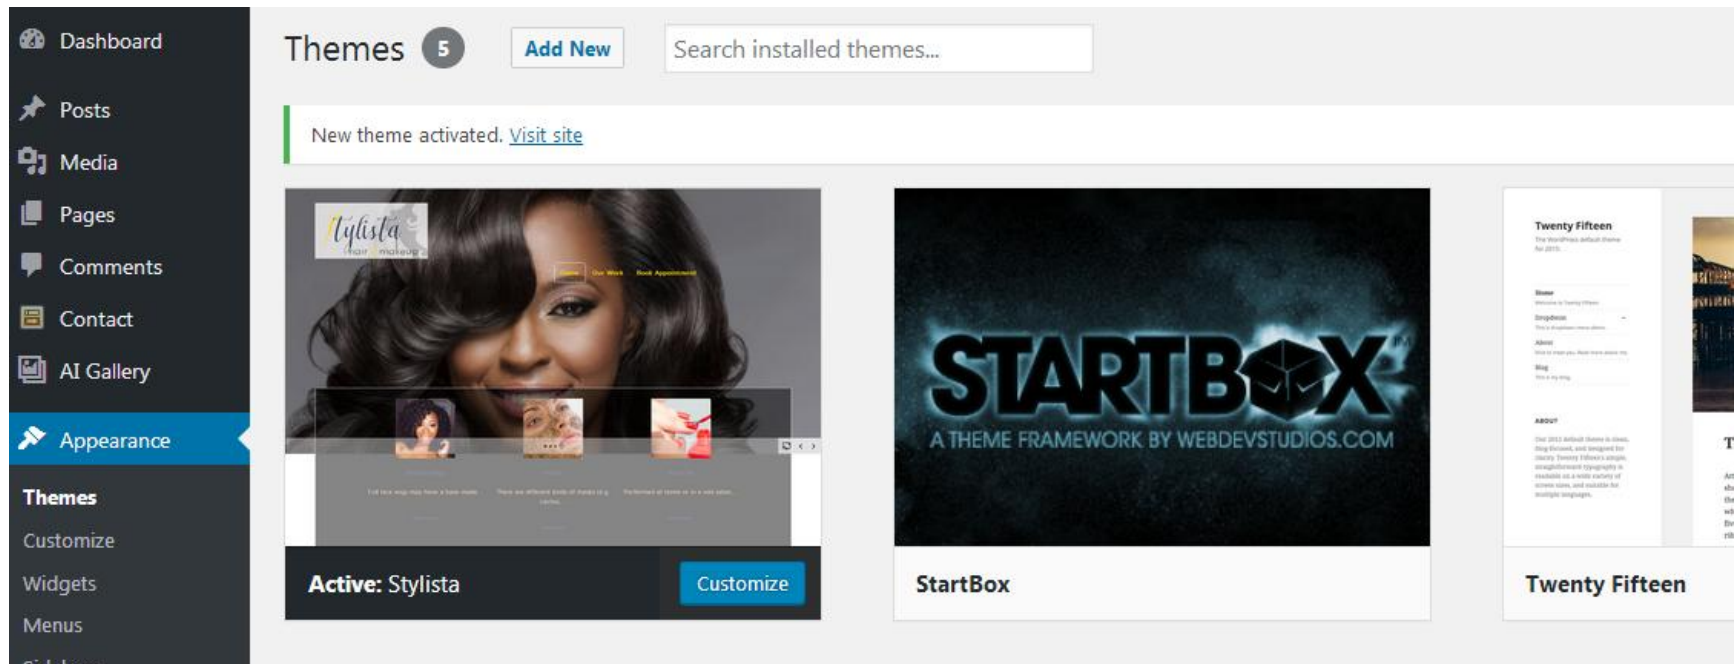

6. On the dashboard, goto Plugins->Add New

   -- Install all plugins shipped with the Stylista Theme

   -- Activate all installed plugins

7. From the Dashboard, goto Tools->Import
 --under WordPress, Click on Install Now then after the install, Run Importer to import the stylista.xml and the media.xml files in the Stylista Theme Distro.

8. See the front end to see the progress, http://localhost/style

Primary Navigation

9a. To get the navigation showing up, first goto Appearance -> Menus

-- create a 'primary' menu and add the menus to it, checking the primary navigation menu as seen below.
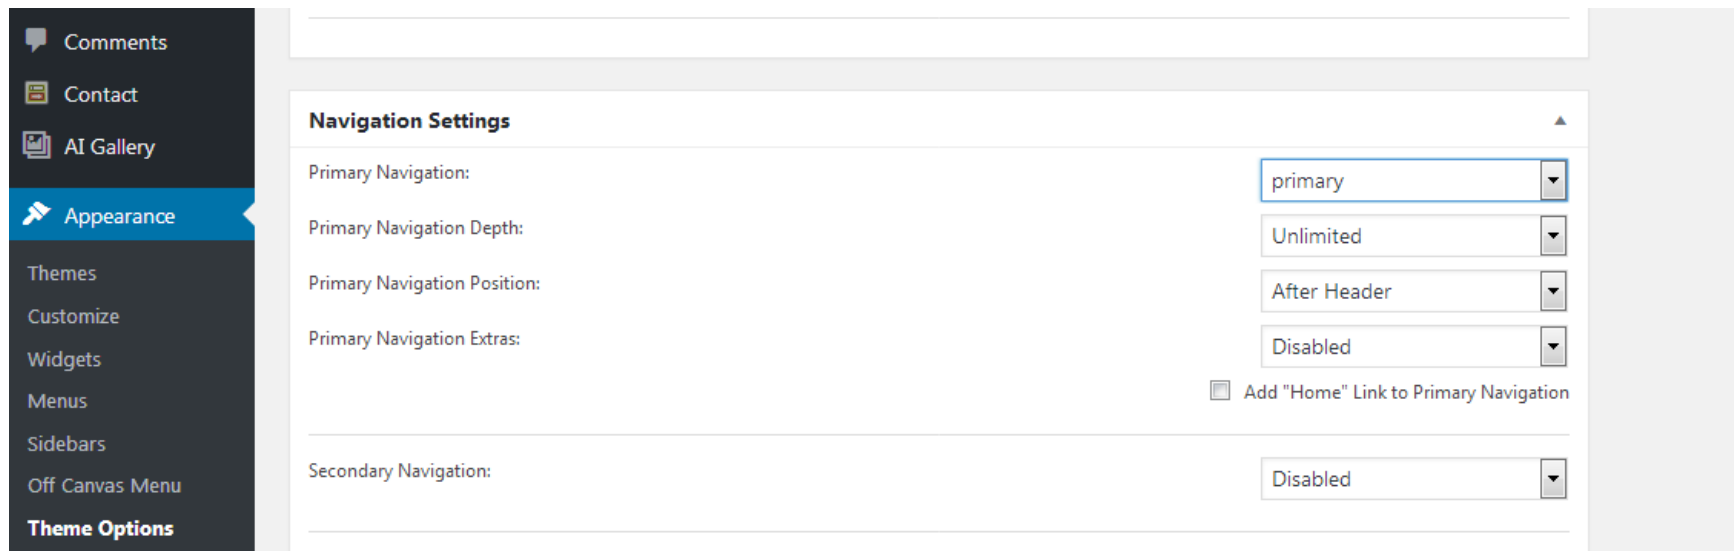

9b. Goto Appearance ->Theme Options

Note * Options include uploading the site logo and favicon, layout settings per page, Google analytics, SEO settings etc.

 -- Activate the Primary menu in the Navigation Settings as seen below;
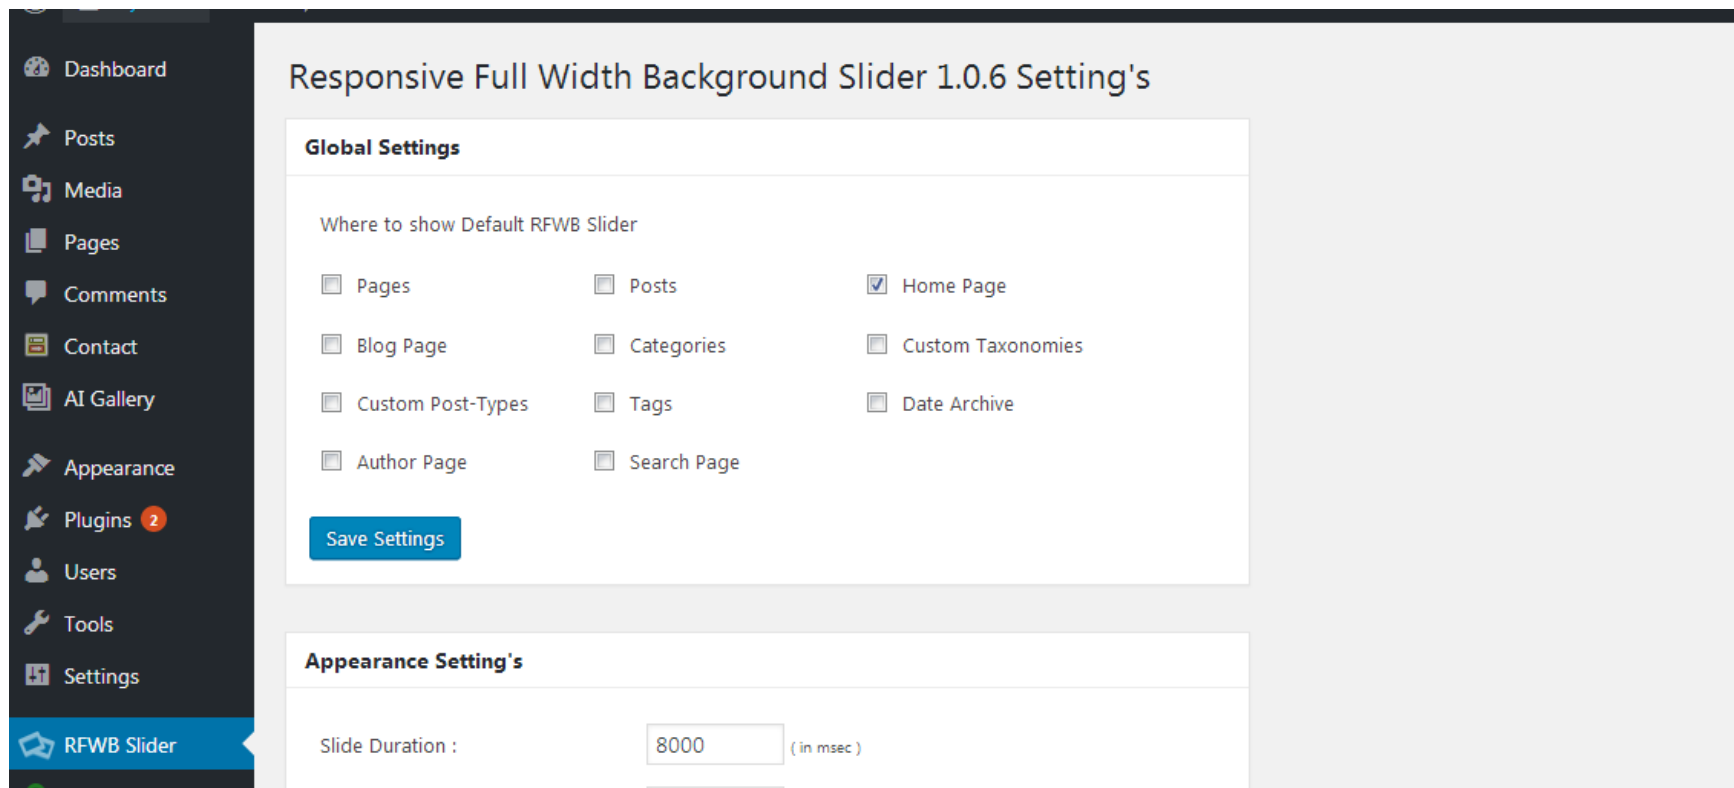

Home Background Slider

10a. Go to the RFWB Slider and activate the slider for the Home Page only as seen below;

Responsive Full Width Background Slider 1.0.6 Setting's

Global Settings

Where to show Default RFWB Slider

☐ Pages   ☐ Posts   ☑ Home Page

☐ Blog Page   ☐ Categories   ☐ Custom Taxonomies

☐ Custom Post-Types ☐ Tags   ☐ Date Archive

☐ Author Page   ☐ Search Page

Save Settings

Appearance Setting's

Slide Duration :   8000   (in msec)

10b. Add background images from the Media -> Library link from the dashboard to override the default images shipped with the RFWB Slider. Or of course, your own desired background images! See screen below;
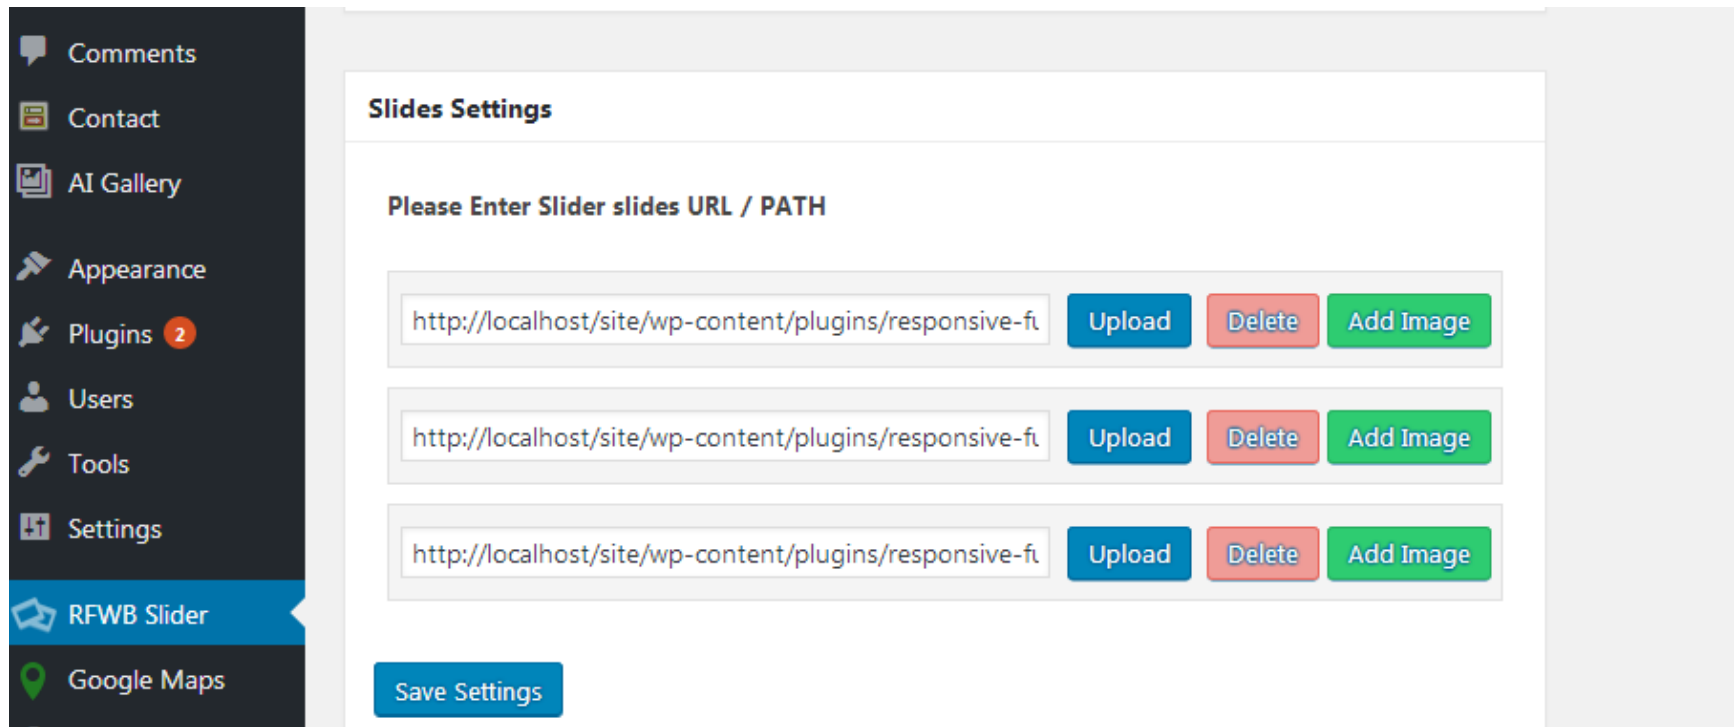

Carousel - The Home page content slider

11a. Goto Settings->CHPC Slider

  -- Activate 'services' under the Categories/Terms section as seen below;

12. Huge IT Google Map -- The Homepage Google map
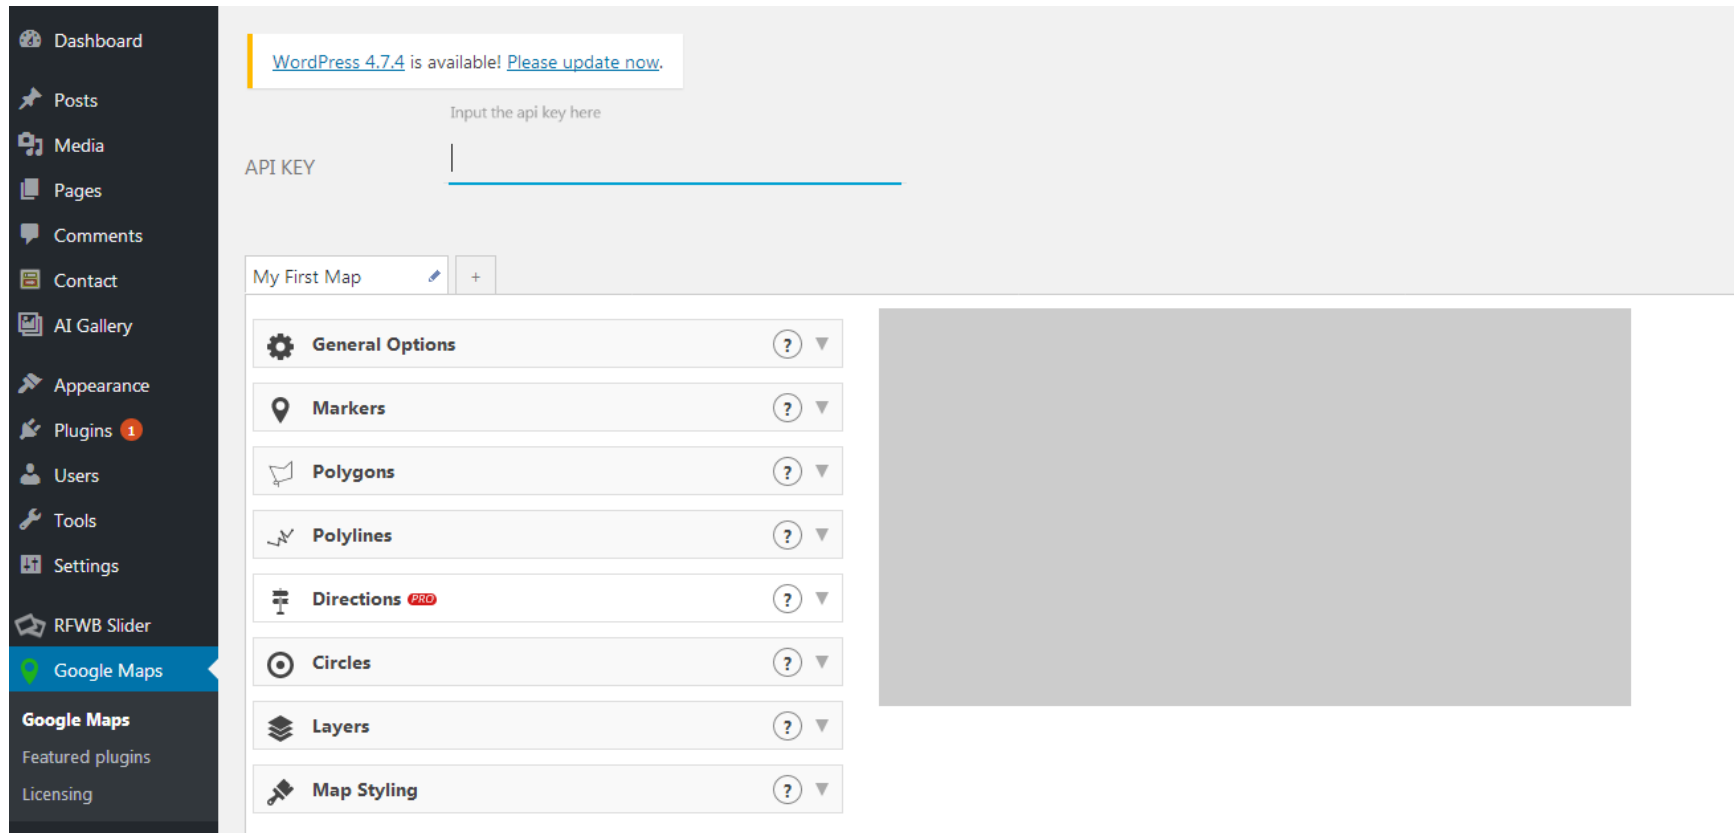

-- make sure to enter your Google Map API KEY so that map can render. See below;

13. AI Responsive Gallery Album

-- For the Gallery / Our Work page. Create an album and then add photos to it.

-- Copy the Shortcode generated and paste into the Our Work page.

For example [Album ID=1,2] for two albums, [Album ID=1,2,3] for three albums.

Note** The Gallery might not necessarily generate the IDs in a particular order so be careful to note the IDs generated such as seen in the screenshot below

| Album Cover Image	Album Date	Album Micro Images	Album ShortCode	Total Images
No Photo Available	2017-05-04		[Album ID=1]	2
No Photo Available	2017-05-04		[Album ID=3]	3

In this case, [Album ID=1,3] -- Notice the IDs are comma delimited.
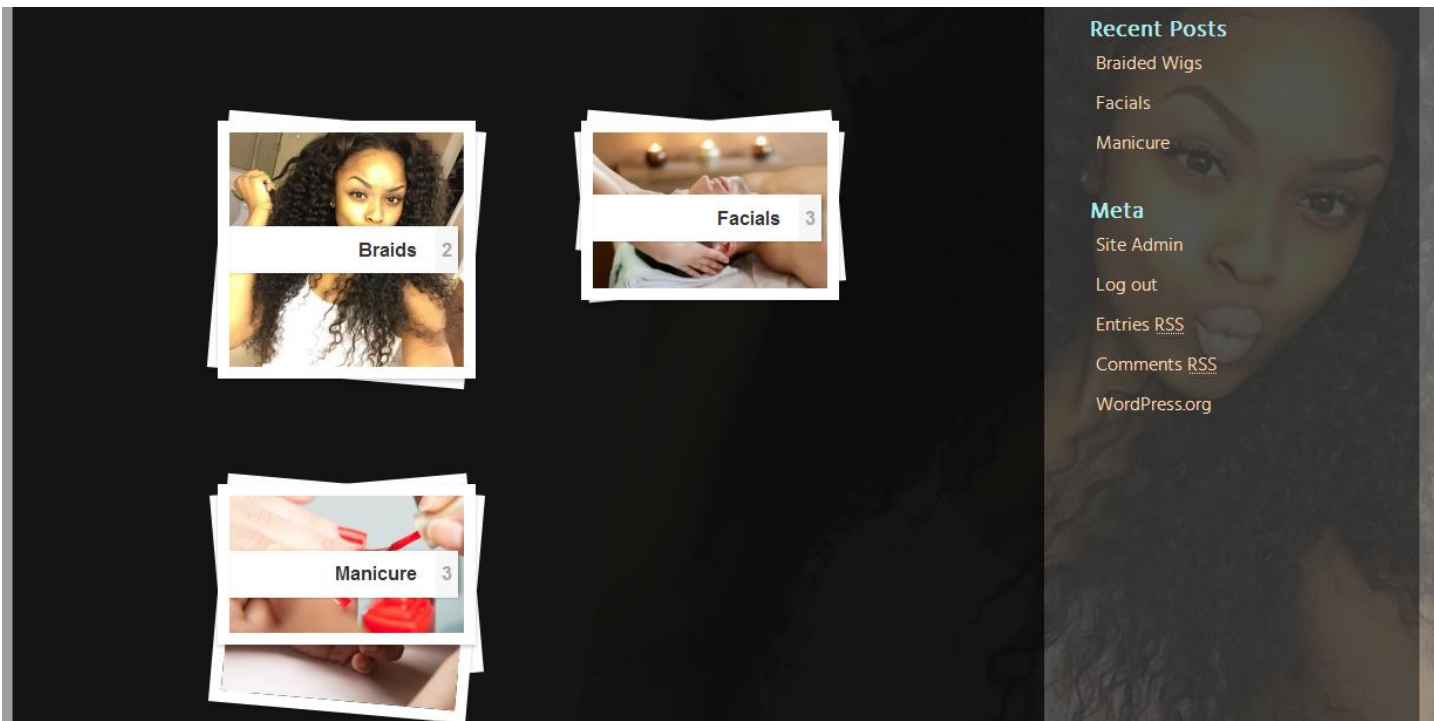

The Gallery result

14. <u>Contact Form 7</u> -- For the Book Appointment page , Click on Contact on the dashboard

To Book an appointment, please fill in the form below or call us on these hotlines:
0909callus, 0706reachus
